Introducing new split bin offering to our customers:

American Reclamation's 3-cubic yard split bins have a center divider that allow one side to be used for the disposal of 1.5 cubic yards of mixed recycling and the other side to be used for the disposal of 1.5 cubic yards of non-recyclable trash. The split bin features a sliding lock bar that permits separate secure closure of the separate lids for each side. This permits the recycling side's lid to be locked closed when the bin is emptied for trash, and the trash side's lid to be locked closed when the bin is emptied for mixed recyclables by our refuse trucks. Split bins are picked up a minimum of twice per week – once for the trash and once for the recycling. Additional pickups for either the trash or recycling sides can be contracted for depending on the customer's needs. The split bin is good solution for customers who have limited space and don't have room on their premises for separate waste and recycling bins, but wish to provide a recycling option for their tenants and/or employees to be in compliance with State of California law AB341 that requires commercial businesses and multi-family residences of 5 units or more to recycle if they generate 4 or more cubic yards of solid waste per week. Split bins can also provide cost savings on monthly garbage bills to customers who have a single 3-yard trash bin.

AMERICAN RECLAMATION

SPLIT BIN USE INSTRUCTIONS

ITEMS THAT GO IN THE BLUE RECYCLING SIDE
